NTT's Home Gateway Setup Manual 2016 Ver 1.0

STEP 1

Connect your computer or tablet to the NTT home gateway by Wifi or LAN cable.

STEP 2

Start web browser. Any web browser is ok.

Click the URL address bar. Then type “<http://192.168.1.1>” then Enter key.

<CAUTION>

When web browser couldn't access “<http://192.168.1.1>”, Often google translatt app is working. In that case, once say “Bad boy Google!!!” then One more try.

192.168.1.1 means NTT homegate way's private IP address to access setup setup page. (No internet No problem when you set it up.)

STEP 3

NTT home gateway asks you ID and password. It means Router Administrator ID and Password. It's not Wifi SSID password. Be careful.

You can see the following page.

The screenshot displays the '接続先設定 (IPv4 PPPoE)' page of the NTT RS-500MI gateway. The page includes a navigation menu on the left, a main title, and two tables for configuration. The first table, '【接続先の選択設定】', lists connection profiles (セッション) with their names, modes, and status. The second table, '【接続ルール設定】', lists connection rules with their names and IP addresses.

接続可	セッション名	接続先名	接続モード	UPnP優先	状態	接続/切断	操作
<input checked="" type="checkbox"/>	メインセッション	NTT RakutenBB	常時接続	<input checked="" type="radio"/>	未接続	接続	編集 削除
<input type="checkbox"/>	セッション2		要求時接続(自動切断する)	<input type="radio"/>	未接続(接続不可)	接続	編集 削除
<input type="checkbox"/>	セッション3		要求時接続(自動切断する)	<input type="radio"/>	未接続(接続不可)	接続	編集 削除
<input type="checkbox"/>	セッション4		要求時接続(自動切断する)	<input type="radio"/>	未接続(接続不可)	接続	編集 削除
<input type="checkbox"/>	セッション5		要求時接続(自動切断する)	<input type="radio"/>	未接続(接続不可)	接続	編集 削除

セッション名	宛先ドメイン名	宛先IPアドレス/マスク長	送信元IPアドレス	操作
セッション2				編集 削除
セッション3				編集 削除
セッション4				編集 削除
セッション5				編集 削除

NTT's Home Gateway Setup Manual 2016 Ver 1.0

You can see the list.

メインセッション means MAIN SESSION

セッション2 means 2nd session

セッション3 means 3rd session

セッション4 means 4th session

See the line of main session. Then right side.

You can see 編集 button. It means EDIT.

TIPS

接続(Setsuzoku) button = Connect

編集(Henshuu) button = Edit

削除(Sakujo) button = Delete

You can access this page.

接続先名 Session name or connection name

接続先ユーザ名 PPPoE Connection User Name (ISP gave you by letter)

接続パスワード PPPoE Connection Password (ISP gave you by letter)

NTT's Home Gateway Setup Manual 2016 Ver 1.0

TIPS

When you changed Internet Service Provider(ISP), Please replace these information.
When you borrowed someone's account temporarily, Please replace to your own one.

Then...

IP アドレス IP address

IP アドレスの自動取得 DHCP(Dynamic Host Configuration Protocol)
Automatic IP address assignment

DNS サーバアドレス DNS server IP address

サーバから割り当てられたアドレスを使用する you wanna use ISP's DNS server

使用する Check ON = ISP's DNS server. Check Off = Your own DNS server or VPN

プライマリ DNS Primary DNS IP address

セカンダリ DNS Secondary DNS IP address

TIPS

When you wanna change DNS IP address for VPN

Step 1. Check Button OFF

Put primary DNS IP address into the blank.

Put secondary DNS IP address into the blank.

(Sometimes VPN don't have secondary DNS. It's not necessary)

Then...when you have done all changes...

At end of this page, you can see 2 buttons

設定 (Settei) means Setup or Execute or Submit

戻る (Modoru) means Return or Back or Previous

Please push 設定 button.

Then push restart button on the front panel of NTT gateway.

Or plug off then plug on.

The end
